⊕ Objective

With a Bachelor's degree in Information Systems from Wachemo University, I am a seasoned Senior Technical Assistant at Werabe University with two years of experience supporting programming courses in computer science. Recognized for academic excellence with a Gold Medal and Certificate of Appreciation, I actively contribute to the community through voluntary work during the COVID-19 pandemic. Currently pursuing Full Stack Web Development (MERN Stack) with Evangadi Tech, I bring a strong foundation in information technology. My expertise in technical assistance, commitment to continuous learning, and leadership make me a valuable candidate for academic and professional roles.

💼 Experience

Werabe University

10/10/2021 - Present

Senior Technical Assistant

As a Senior Technical Assistant at Werabe University, My responsibilities encompass assisting in the preparation and execution of laboratory sessions, offering technical guidance to students, and maintaining the functionality of equipment and software essential for effective learning.

Key Achievements and Responsibilities:

- Provide hands-on assistance to lecturers and students during programming courses, specializing in C++, OOP(JAVA), Web Development(HTML,CSS, JAVASCRIPT).

- Demonstrate expertise in troubleshooting technical issues and ensuring the smooth operation of lab equipment.

- Contribute to the development of instructional materials, including lab manuals and technical documentation.

- Foster a positive learning environment by actively engaging with students and addressing their queries.

🎓 Education

Wachemo University

August 7, 2021

Bachelor of science in Information Systems

Adeptly merging theoretical knowledge with practical application, my Bachelor's degree in Information Systems from Wachemo University reflects a commitment to academic excellence. Achieving a CGPA of 3.79, I developed a strong foundation in technology, preparing me for a dynamic role.

Evangadi Tech

2024

Full Stack Web Development(MERN)

Currently enrolled in an online learning program focused on Full Stack Web Development, specializing in the MERN (MongoDB, Express.js, React.js, Node.js) stack.

🚀 Skills

Programming Languages: [Java, Python, C++,C#.]

Database Management: [MySQL, MongoDB]

Web Development: [HTML, CSS, JavaScript, React]

Software Proficiency:[VS code, Pycharm, Anaconda for Machine Learning Project]

Operating Systems: [Windows, Linux]

Problem-solving: Proven ability to troubleshoot and resolve technical issues effectively.

Team Collaboration: Collaborative approach in supporting lecturers and assisting students during lab sessions.

Communication: Clear and concise communication skills demonstrated through interactions with students, lecturers, and hospital staff during voluntary activities

🚀 Projects

LAN Based Store Information Systems for Wachemo University

During the final year of my Bachelor's degree, I spearheaded the development of a LAN-based Store Information Management System. This project involved designing and implementing a robust system for efficient store management, utilizing local area network (LAN) connectivity. The system integrated functionalities for inventory tracking and reporting, contributing to streamlined operations and improved decision-making processes. The project showcased my skills in software development, database management, and problem-solving, providing a practical application of my academic knowledge in Information Systems.

🏅 Achievements & Awards

Awarded a Medal and Certificate of Appreciation from Wachemo University College of Engineering and Technology for exceptional academic achievement, showcasing a dedication to excellence and a commitment to academic success throughout my Bachelor of Science in Information Systems.

Acquired a Certificate of Completion in Introduction to IoT from SimpliLearn Online Learning Platform, demonstrating proficiency and knowledge in Internet of Things technologies. Earned a Certificate of Completion in Introduction to Project Management from SimpliLearn Online Learning Platform, showcasing skills in project planning, execution, and management. Attained a Certificate of Completion in Introduction to Robotic Process Automation from SimpliLearn Online Learning Platform, demonstrating expertise in the field of automation and process optimization.
